

Perseverance Lesson 1

Perseverance means having the determination and the persistence not to give up.

Imagine taking your first step on a journey to gather great treasures. You know the first step will be your hardest step and each step after the first one will be just as hard as the first. But the treasures and gifts that you will receive on this journey make you want to start the journey no matter how hard it will be. Taking the first step shows determination and each step you take after the first one is the persistence you will need to continue along the way. When you have reached your destination and you have been rewarded for your hard work and effort it is truly your perseverance that you have to be thankful for.

Everything that we try for the first time is like a journey to gather great treasures. The first piano lesson, if the goal is reached will give you the gift of music. The first basketball practice, when a session is complete gives you a greater appreciation for the game. The first advanced math class, once the course is complete will give you the skills to calculate your accomplishments. Whatever the journey may be, there will be obstacles that will sometimes be tough to overcome but if you keep on trying, don't give up, the rewards are great. When we work hard to achieve our hopes and dreams no matter how difficult the journey, that's "Perseverance".
